

Covid-19 Advisory

Following the initial surges in Coronavirus outbreaks and the public health measures to curb the spread of the disease we underwent a period reduction of service and temporary closure. We have since returned to pre-covid levels of service. We are mindful of the recommendations of the national Center for Disease Control and the mandates of public health authorities. To that end we have implemented the following measures. During hours of operation we employ ultraviolet ozone air purification as well as an enhanced 2 micron internal air filtration system. Additionally, out of concern for the health and welfare of all and in the hope that by working together we can rid our community and country of the Covid-19 menace, we maintain a contact distancing level of at least 6 feet as well as the availability of face masks. We reserve the right to limit service to unvaccinated individuals. Our office is deemed in full compliance with Covid-19a/SARS 2 protocols. Prospective clients are always advised to defer hypnotherapy during periods of respiratory infections including colds and episodes of influenza. In all cases we advise our clients to obtain updated vaccinations for both Covid and Influenza.
